

DESK42

PIXEL-ART VISUAL IDENTITY

VERSION 1 / ARTIST HANDOFF

CORE DESK STAGE - PAPER, MACHINE, EMPTY SPACE

CORPOS

PROP LANGUAGE

OFFICE

PAPER

TASK

STAMP

ANOMALY

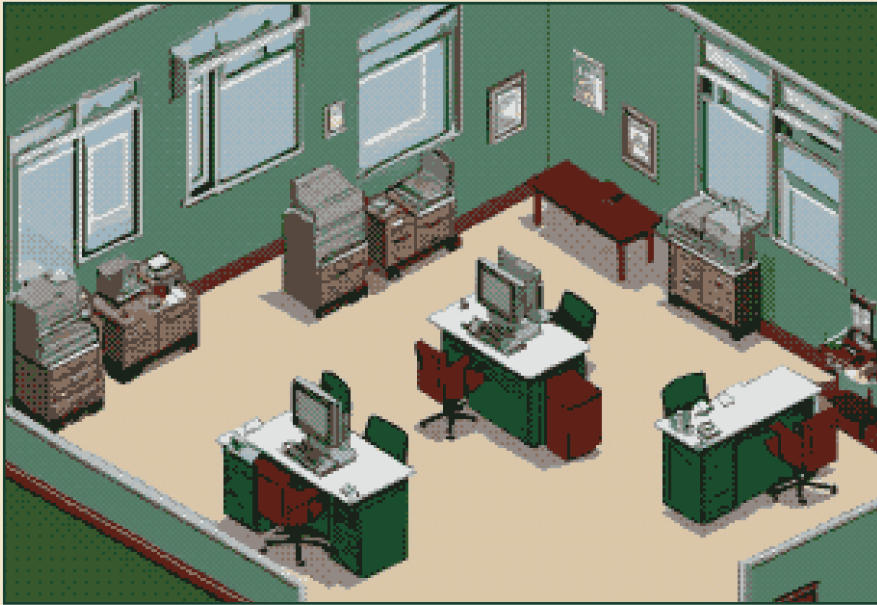

RUPTURE

70 / 20 / 8 / 2

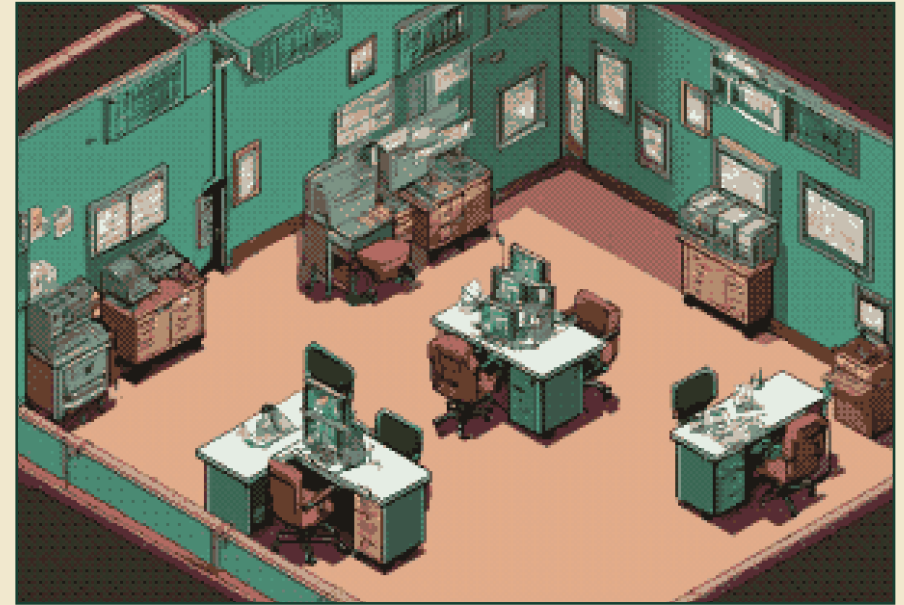

base / neutral / task / anomaly

Analog authority. Paper as world. Controlled intrusion. Hostile geometry.

Concept references are direction, not production sprites.

HEALTHY OFFICE - ORDERED, LEGIBLE, FAINTLY COMFORTING

DEGRADED OFFICE - SAME GRAMMAR, CROOKED REALITY

01 ANALOG AUTHORITY

Cream laminate, Bakelite controls, chrome mechanisms, CRT glass, punched paper and brass lamps.

03 CONTROLLED INTRUSION

Teal, electric blue and rare magenta identify phenomena the office cannot classify.

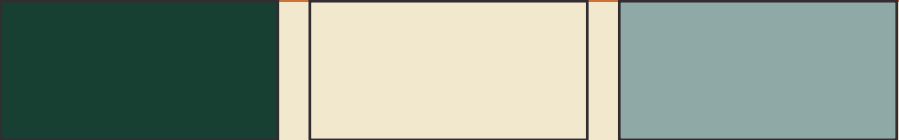

02 PAPER IS THE WORLD

Forms define task state, spatial zones, hierarchy, progress and failure. Paper is a system, not dressing.

04 HOSTILE GEOMETRY

Low sanity corrupts known compositions through scale, lean, gaps, displaced baselines and detached UI.

OFFICE - HEALTHY

Deep green
#173F32

Paper cream
#F1E8CE

Dusty blue
#8FA9A6

Warm grey
#77736A

Task orange
#CE713A

Approval red
#B73B32

OFFICE - DEGRADED

Yellowed paper
#D8C58B

Rust orange
#A44E2D

Sickly green
#7D8E3C

Soot brown
#332C30

ANOMALY

Anomaly teal
#20D6C7

Electric blue
#4AA7FF

Glitch magenta
#D447A7

META HUB

Warm wood
#6A402B

Brass
#B68849

Amber
#E2A552

70 / 20 / 8 / 2

Base structure / neutral support / task accent / anomaly color. Magenta is a rupture, never an ordinary selection state.

CORE DESK REFERENCE - REDRAW ON THE PRODUCTION GRID

ZONE MAP

1 INBOX

New claims arrive from upper-left.

2 PROCESSING

Central work area and strongest light pool.

3 OUTBOX

Completed or rejected claims move upper-right.

4 PERSONAL

Mug, photo, notes and upgrades humanise a corner.

5 DEAD ZONE

Purposeful empty space reserved for anomalies.

DUAL-USE TEST

- Stapler: fastener -> weapon or restraint
- Lamp: hidden text -> containment beam
- Mug: focus buff -> eavesdropping vessel
- Shredder: destroy -> confetti barrier
- Stamp: final action -> seals reality state

PRODUCTION RULES

- Every hero prop needs one office read and one anomaly read.
- Use one dominant silhouette and only the details needed to explain interaction.
- Share cream enamel, deep green metal, brass, paper and approval-red ramps.
- Keep contact shadows short and consistent with upper-left fluorescent light.
- The sheet is shape reference only; redraw each asset at 24, 32, 48 or 64 native pixels.

MATERIAL CUES

BAKELITE	rounded dark body / tight white specular
CREAM ENAMEL	broad flat planes / warm chipped edge
CHROME	two-step cool band / no soft reflection
PAPER	cream field / one shadow ramp / sparse fibre
BRASS	warm midtone / amber highlight / brown base

CLAIMANT SILHOUETTE DIRECTIONS

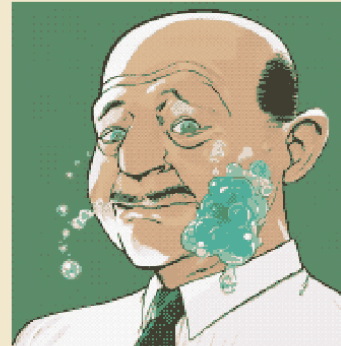

Corporate ID framing stays fixed. One impossible feature carries each identity.

MOTH ACCOUNTANT

feathery antennae
tired symmetry

CONCEPT ONLY

GEL ANOMALY

human read disrupted by teal matter

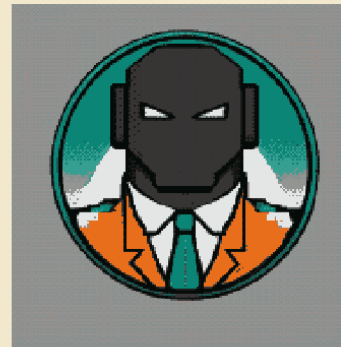

CONCEPT ONLY

UNREGISTERED ALIEN

oversized eyes
sober office tailoring

CONCEPT ONLY

VOID PROXY

flat dark mask
teal machine rim

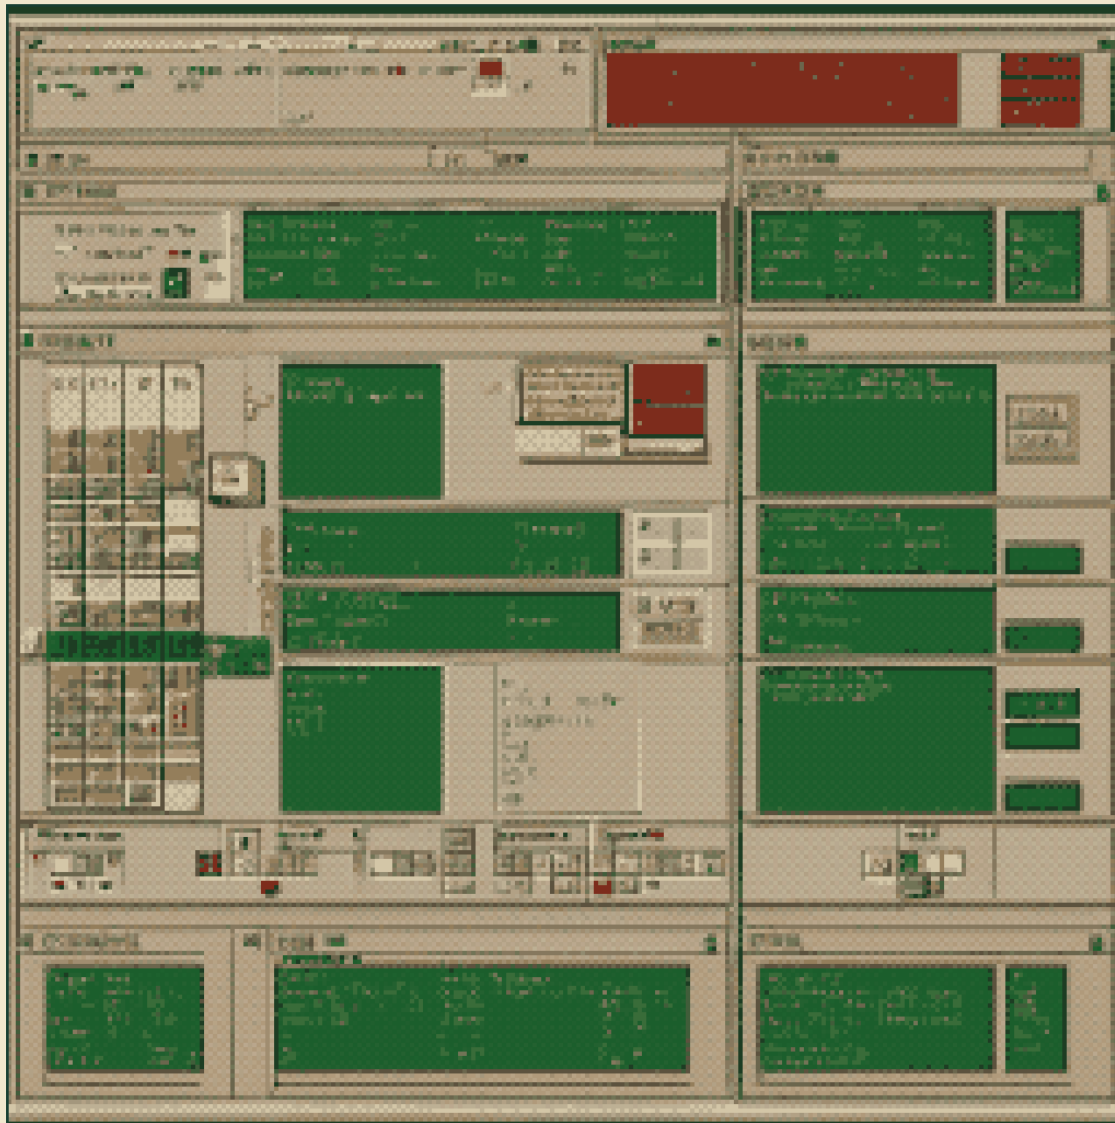

CONCEPT ONLY

One silhouette hook, one material hook and one behavioral hook per claimant.

Keep the corporate ID crop consistent so species differences remain legible.

Use sober office clothing; let one impossible feature carry the anomaly.

Treat these four images as direction seeds. Do not trace or ship them unchanged.

INTERFACE GRAMMAR

- Windows are forms: title strip, ruled body, stamp/status corner and punched tabs.
- Cream is the readable field; deep green is structure; muted orange is task focus.
- Teal and electric blue mean unclassifiable truth. Magenta means rupture.
- Use block cursors and thick rectangular focus states. Do not rely on glow.
- Avoid glass panels, pill buttons, blur and generic neon cyberpunk framing.

TYPE DIRECTION

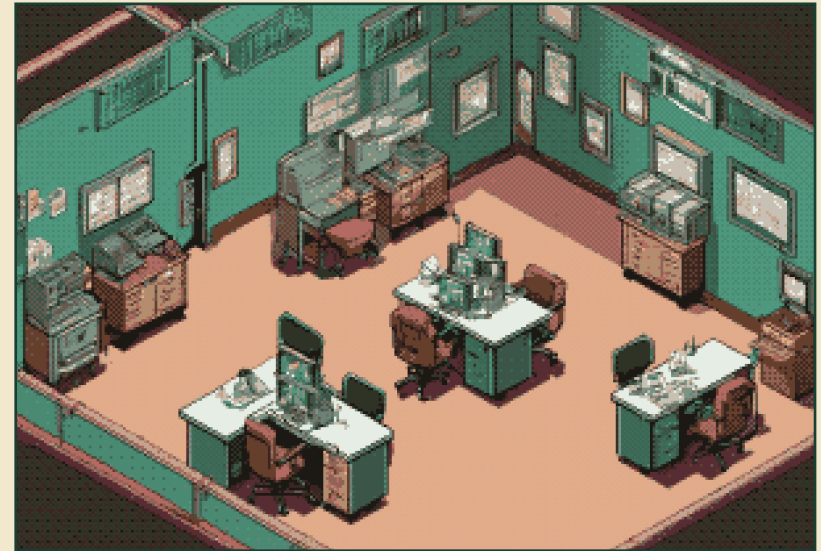

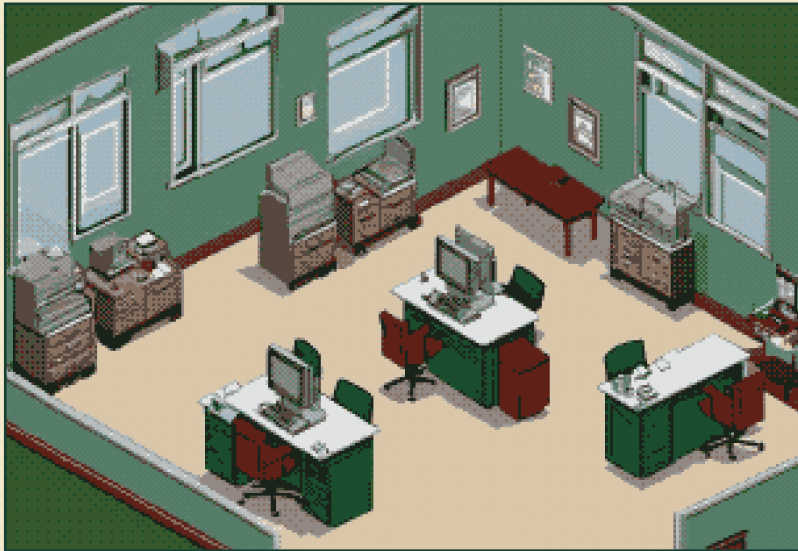

CORPORATE HEADING

FORM OUTPUT / CRT GLYPHS

Use licensed geometric grotesk and monospaced faces, or draw a custom bitmap alphabet. All lettering inside generated concept images is placeholder noise.

Sanity distortion ladder

CORRUPT THE KNOWN COMPOSITION

100 - 75

CLEAN

Correct perspective, warm stable light, strict baselines, clean paper.

74 - 50

UNEASY

Flicker, longer shadows, slight asymmetry, one displaced pixel edge.

49 - 25

CONTAMINATED

Leaning walls, yellow-green cast, crooked forms, subtly wrong scale.

24 - 1

IMPOSSIBLE

Detached UI, gaps, desaturated edges, teal intrusion, rare magenta rupture.

0

FUGUE

Near-desaturated scene; foreground and interface disagree on position.

PIXEL CONSTRUCTION

- Compose at 320x180 or 384x216, then scale by whole integers.
- Use hard clusters and selective one-pixel outlines.
- Share 12-24 color ramps across each asset family.
- Upper-left light; two shadow steps; no smooth gradients.
- Redraw icons at 16, 24 and 32 instead of scaling one master.

DELIVERY PACKAGE

- Layered Aseprite, PSD or equivalent source files.
- Transparent PNG exports with no resampling.
- Palette file, frame sizes, pivots, timings and state names.
- Separate desk, paper, lighting and anomaly layers.
- Font files with license information and CorpOS 9-slice map.

UNITY IMPORT

- Texture Type: Sprite (2D and UI).
- Filter Mode: Point.
- Mip maps: Off.
- Compression: None for identity-critical pixel art.
- Keep Pixels Per Unit and sprite pivots consistent.

NAMING

D42_[Category]_[Name]_[State]_[Size]_v###.png

Example: D42_Prop_Stapler_Anomaly_48_v001.png

All ComfyUI images in this pack are concept references. Production assets must be redrawn, cleaned, layered and validated at native size before shipping.
